NEW SPECIAL
 DELIVERY MONTH ADDITION
 (CALL/PUT VOLUME RATIOS)

The call/put volume ratio for options is said to act as a leading indicator for the parent product. When the ratio is very low the market is considered oversold and vice versa.

We are adding a #62 (and possibly a #63) delivery month code to our data base which will produce the call volume and the put volume on one record and the call open interest and put open interest on another.

Such information will be available for commodities which have options on a delayed basis and certain stock indices such as DEX, XAU, XVL, and XMI on a current day basis. SPX and NYA will only be available on a delayed basis.

We hope to develop software which will make use of the call volume/put volume ratio on market analysis. It may be useful in its current form to traders who have a facility to form the ratio for predictive purposes.

PDI™ FEED BACK

Users who have our new release of PDI III have been very complimentary of its performance. Users are also finding it to be very helpful in trading the securities markets. No errors have been reported in the new software.

One active trader and avid purchaser of all forms and brands of software reported that PDI often timed market entry to the exact optimum day and was at least 3 days earlier in signaling market entry than any study he has experienced.

IBM PC/XT® HARDWARE OFFER EXTENDED

In last month's News Journal we failed to

repeat a mention of the 5% discount we are allowing on our IBM PC/XT clone. Therefore, we are extending until January 15th, 1987 the opportunity for you to purchase this equipment at that discount.

Our \$849 model, can be obtained for \$806.55. This model includes two 360K floppy drives, a keyboard, composite monitor, color graphic card, 256K memory, and a 33% speed upgrade for the 8088 processor chip.

The deluxe \$1795 model includes all of the above, with one 20MB hard drive substituted for one of the floppies, plus a 1200 baud modem, a printer interface card and a 120cps near letter quality printer for only \$1705.25.

We are having very minimal reliability problems with these systems, and no one should be reluctant to purchase one if you have a need. Our price is a small fraction of IBM's charges, and if there is a problem you may return the merchandise within ten days for a 90% refund less the shipping cost.

Our price list is included. You may notice that a 30MB disk may be substituted for the 20MB disk on the \$1795 system special model for only an additional \$150.

CUSTOM PROGRAMMING

Attention South Florida users: If you need programming assistance, you may write to Phil Borod, The Information Craftsman, P.O. Box 693218 in Miami, 33269, or call him at 305/652-2930. He has received high marks for his efforts on several customer projects.

The PhiBet Company is offering custom QUICKTRIEVE-compatible software to our users for specialized studies, trading models, graphics and system automation on APPLE and IBM computers. For information contact The PhiBet Company, Data Service Division, 305 North East Street, Indianapolis, IN 46202, 317/638-9399.
