On August 1st we lowered our historical charges for users of our domestic Compunet service. Unfortunately, because of the way the network is structured, foreign users cannot benefit except as provided in "New QUICKTRIEVE Release" below. Users can now access historical data by phone via Compunet for rates nearly the same as long distance callers. We can provide this price reduction because of the reduced rates Compunet imposes on CSI for off-hour use.

These special rates apply to QUICKTRIEVE orders of 24 to 100 data months collected via Compunet when data is retrieved during night hours. "Off hours" for history collection are defined as 6 PM to 8 AM Monday -Friday including weekends from 6PM Friday to 8AM Monday (local time).

We welcome the opportunity to provide this reduction; however, in order to take advantage of this offer we require all night time discount orders be confirmed with customer service. In other words, please let us know your intent to use Compunet for your orders by sending a message through the customer subsystem or confirm your mode of access to the representative with whom you place your order. You must then confine your collection to the above time periods to benefit from the off-hours discount.

NEW QUICKTRIEVE RELEASE 3.1

The new QUICKTRIEVE release has, among other things, advantages for Foreign users who may wish to avoid local PTT accessing problems, charges, passwords and policies. A new International Dialog file permits non-U.S. users to access CSI nearly as easily as callers local to our Boca Raton headquarters.
